INSTALLATION INSTRUCTIONS

INSTALLATION INSTRUCTIONS -FLOATING CANOPY

CAUTION-Turn off switch at main power source before installing any track or fitting.

1. Fasten mounting strap to outlet box. Connect ground wire.
2. Locate track below outlet box in desire position then:
   a) Rotate ground clip to accept track and push track into clip.
   b) Fasten track to ceiling following instructions supplied with the track section.
   c) Track ends must be terminated with either a dead end or a connector.
3. Insert electrical adaptor into track, rotate 90° to locked position to make electrical contact. NOTE:
   a) Polarity side of electrical adaptor (The side of grounding tab or marked "N") must point to track debossed polarity line.
   b) Center line of electrical adaptor must be set on center line of outlet box.
4. Pull positive (Black) wire from outlet box and attach to brass screw terminal marked "P". Pull neutral (White) wire, on opposite of track, and attach to nickled-plated screw terminal marked "N". Push excess wire back into outlet box-wire must hug track side. Install cover and secure with screw.
