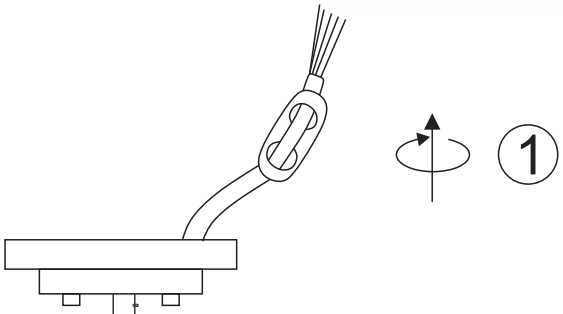
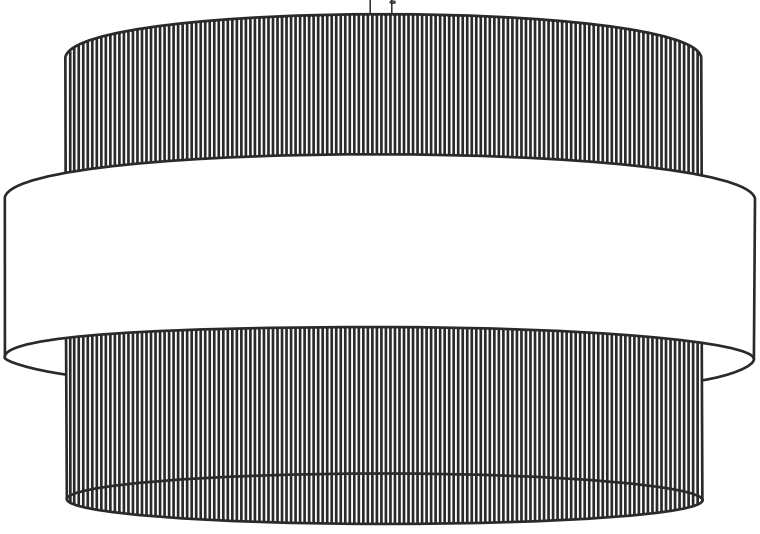
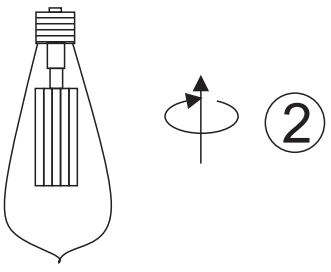
Adjust the wire to demand length by adjusting the plastic cable piece.



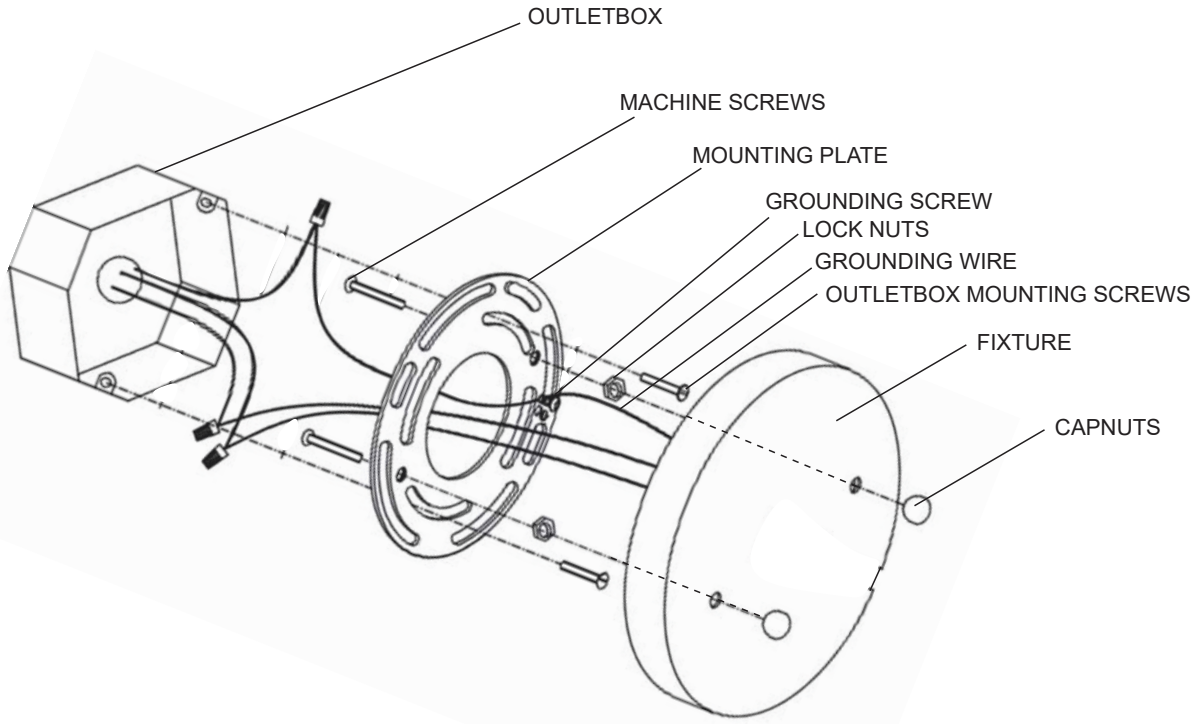
NOTE: This fabric cord is intended to have natural curves. However, if you prefer it to look straighter, you can follow these directions:

Bends in corded pendants are normal. If a heavy shade is being used, the cord will tend to strengthen more over time. To speed up the process, adding heat to the cord will often help. This can be accomplished with a hair dryer, a heat gun on a low setting to avoid burning the fabric or using a 100-watt incandescent bulb for a period rather than an LED.





STANDARD MOUNTING PLATE INSTALLATION INSTRUCTIONS



CAUTION :DISCONNECT POWER DURING INSTALLATION

1.) Ifyou are replacing an existing fixture, disconnect and remove the old fixture. Expose the supply wiring from the outlet box.

2.) Thread the machine screws into the opposite side ofthe mounting plate from the green ground screw, lock the machine screws into place with lock nuts.

3.) Fasten the mounting plate tothe outlet box using the two screws supplied with the outlet box.

4.) Spread the electrical wires so that the black wires are on one side ofthe outlet box and the white wires are on the other side.

5.) Grounding instructions:

A.) On fixtures where mounting plate is provided with agreen ground screw and two raised dimples, Wrap ground wire from outlet box around green ground screw and tighten.

B.) On fixtures where mounting plate is provided with agreen ground wire attached. Connect mounting plate ground wire to ground wire from outlet box with wire connector (not provided).
Iffixture isprovided with ground wire, Connect fixture ground wire toground wire from outlet box with wire connector (not provided). After following the above steps. Never connect ground wire toblack or white power supply wires.

6.) To make electrical connections: Connect the white wire(s) from the fixture tothe white wire ofthis outlet box. Connect the black wire(s) from the fixture tothe black wire ofthe outlet box. NOTE: Black outlet box wire may be red, round &smooth and/or have copper conductor. White outlet box wire may be square &ridged and/or have asilver conductor.

7.) Place fixture against mounting surface allowing the machine screws topass through the fixture cover plate. Secure with cap nuts.
